Dan,

It was a pleasure meeting with you on Friday. I think we were able to settle some issues.

I would like to summarize for the record what came out of the meeting so we are on the same page.

1) Pine Ridge rock would like to submit a NOI for a Small Mining Operation (10 acres or less outside of incorporated areas). This is because you indicated that certain areas are already regraded to conform to surrounding areas and are waiting for revegetation. Your actual active disturbance is under 10 acres. I will confirm this with an on-site visit, likely the last week of July.

2) New disturbances that will become necessary to chase surface material will be required to be reclaimed. This new disturbance will be compensated by concurrent reclamation of previous disturbances to maintain a disturbed area balance under 10 acres.

3) Pine Ridge Rock will remove the fuel storage tank and containment from the site, and clean up and remove empty containers.

4) I was in error regarding the cultural resources (CR) survey requirements. The permit application will require a CR clearance. Most likely, a Class I clearance will be sufficient. I would contact a state-registered archaeologist to get this under way. The closest one to you is likely Sagebrush Consultants, out of Ogden. But there are others on the SHPO web site.

5) Pine Ridge is proposing to submit a Letter of Credit for the surety bond. The proposed bond amount is \$70,700. This was calculated as follows:

Standard 5-year escalation bond on 6 acres = \$37,900

Additional acres @ \$5,200/ac x 4 acres = \$20,800

10 acres of regraded disturbance needing revegetation = \$12,000

Total required for permit = \$70,700

The bond would be required to have a periodic 5-year escalation evaluation in 2019.

6) Pine Ridge must get the Small Mine NOI submitted by 8/18/2014. The Small Mine permit number is S/057/0010.

If you have any questions, please let me know.

Thanks for your cooperation in getting this site permitted.
